C+ Liquid Gold Infusing Serum from dEp patch blends vitamins A and E, and ascorbyl glucoside—a stable form of 20% vitamin C—to stimulate collagen production and support skin elasticity, while evening out skin tone and texture. Results are enhanced when used in conjunction with the dEp patch Full Face Mask, which uses a transdermal delivery system for increased vitamin C penetration. Contact: 888.775.0595, deppatch.com.

Marini Luminate Hand Cream from Jan Marini Skin Research is formulated with 15 key ingredients to reduce signs of aging and rejuvenate skin on the hands. Actives include: retinol to diminish the appearance of fine lines and wrinkles; skin brighteners azelaic acid, alpha arbutin and kojic dipalmitate; antioxidant pomegranate and cucumber extracts; hydrating glycerin and vitamin E; and sunflower seed and meadowfoam seed oils to reduce irritation. Contact: 888.695.2611, janmarini.com.

Revision Skincare’s Nectifirm contains eight active ingredients that work together to strengthen the dermal-epidermal junction. They include bamboo, silica, English pea extract and glucosamine to firm; tripeptides for fine lines and wrinkles; and plant-derived flavonoids to reduce fat cells. Contact: 800.385.6652, revisionskincare.com.

Mybody Probiotic Skincare’s myHERO Multivitamin Youth Serum firms and brightens skin with a powerful blend of retinol boosters, antioxidants, vitamins and peptides. The formula encourages collagen production to decrease the appearance of fine lines and wrinkles. Contact: 877.423.1314, mybodyskincare.com.

Body of Knowledge Slimming and Contouring Cream from Biopelle’s PRESCRIBEDsolutions skincare line features the company’s proprietary Slimming and Reducing Complex, which builds collagen, stimulates lipolysis and firms the skin to reduce the appearance of cellulite. It can be used alone or to complement body contouring procedures. Contact: 866.424.6735, biopelle.com.
Protection for Sensitive Skin

EltaMD UV Clear Broad-Spectrum SPF 46 helps calm and protect sensitive skin prone to breakouts, rosacea and discoloration. Available in tinted or untinted, the oil-free formulation features transparent zinc oxide (9%) plus niacinamide, hyaluronic acid and lactic acid to support skin health. 800.633.8872, eltamd.com.

Replenix UltiMATTE Perfection SPF 50+ Tinted Physical Sunscreen from Topix Pharmaceuticals is a combination BB cream and sun block featuring micronized zinc oxide (16.2%), plus ceramide 2 and phospholipids to control oil while gently hydrating skin. 800.445.2595, topixpharm.com.

Sheer Physical Protection SPF 50 from NeoStrata provides broad spectrum protection with physical sunblocks titanium dioxide (7%) and zinc oxide (6%). The ultra-fine sunscreen has a virtually invisible tint and includes antiaging gluconolactone and lactobionic acid plus antioxidants. 800.225.9411, neostratapro.com.

Jane Iredale Powder-Me SPF is a dry SPF 30 sunscreen that can be used on the face, body and scalp. The powder contains titanium dioxide (17%) and natural clay to calm and nourish sensitive skin, plus boron nitride to diffuse light. Available in three shades—Golden, Tanned and Translucent. 800.762.1132, janeiredale.com.

Mybody Protect & Serve Tinted Sun Shield SPF 30 is a lightweight, water-free lotion that features physical sun blocks titanium dioxide and zinc oxide fortified with antioxidant Lycomato (lycopene) to protect sensitive, irritated skin. 877.423.1314, mybodyskincare.com.

Eau Thermale Avène Light Hydrating Sunscreen Lotion SPF 50+ and Ultra-Light Hydrating Sunscreen Lotion SPF 50+ offer 100% physical sun blocks (micronized titanium dioxide 4% and zinc oxide 6%), plus Avène Thermal Spring Water and vitamin E to soothe sensitive skin. 866.412.8363, aveneusa.com.

Jane Iredale PurePressed Base Mineral Foundation SPF 15 is made from micronized minerals that soothe skin, conceal redness and diffuse the appearance of fine lines and pores. Available in 24 shades. 800.762.1132, janeiredale.com.

Sheer Physical Protection SPF 50 from NeoStrata provides broad spectrum protection with physical sunblocks titanium dioxide (7%) and zinc oxide (6%).
