## GLOWBIOTICS Gentle Probiotic Calming Lotion

**Application Topical probiotic lotion**  
Ideal for all skin types, this gentle and lightweight probiotic lotion helps soothe, soften and hydrate dry, rough, irritated skin for a visibly brighter, more even complexion. The hydrating formula helps improve texture and strengthen the natural skin barrier function by increasing syntheses of ceramides to help soften the appearance of fine line and wrinkles. Packed with Shea Butter, Evening Primrose Oil, Niacinamide and Hyaluronic Acid, this comforting moisturizer also improves skin conditioning, restores suppleness and protects the skin from dehydration and other climatic influences. It also utilizes Granactive™ AR-1423, a unique combination of soothing tea extracts and antioxidants plus a lipo-oligopeptide technology to help calm red, inflamed skin.

SymCalmin®, a complex from oat fractions has proven anti-irritant, anti-itch and redness reducing effects. Beta Glucan, an oat-derived prebiotic, helps repair and stimulate collagen while Probiotic Derived Bioactives boost skin's immunity and mimic the skin's own repair function without typical inflammation.

## POLLOGEN DIVINE PRO

**Application Multifunctional facial treatment platform**  
DIVINE PRO is the ultimate facial treatment platform, allowing practitioners all the treatment benefits of a 'big box' device in a compact, desktop system. DIVINE PRO's comprehensive toolkit offers effective facial rejuvenation that can be personalized to the customer's needs. Designed for comfort and flexibility, DIVINE PRO comprises of 4 clinically-proven technologies: TriPollar, DMA, RFF Microneedling and RFF Resurfacing. It provides endless treatment combinations for encouraging and enhancing the body's own rejuvenation processes in order to achieve smoother, tighter skin, improved facial contouring and refreshed complexion. DIVINE PRO multifunction platform provides practitioners with the opportunity to create a tailor-made treatment plan for each customer in order to achieve the desired effects in a safe and comfortable manner, with immediate results and minimal pain and downtime. Divine Pro: a compact package that delivers great things to you and your customers.

## MEDIDERMA SPECTRUM MASK

**Application Skin rejuvenation, acne-prone skin, medical post-treatments booster**  
Multifunction mask for face and neck with Low-Power LED technology and galvanic current. Through its ergonomic design we obtain a more intense energy due to the direct and occlusive contact with the skin (2 mm distance between LED and skin). The PAN therapy marks the beginning of a new era of non-invasive medical treatments. It consists in the application of photosensitive natural substances, encapsulated in liposomes, which penetrate in the skin rapidly reaching the target tissue. These substances, when irradiated with the suitable wavelength, photo-activate and turn into thermal energy, thus triggering the photo-oxidation of biological tissues (ROS) and the activation of the cell's metabolism (ATP).
